ELSEVIER

Thin Solid Films 371 (2000) 318–322

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 371

Adhesion
The mechanical stability of Langmuir–Blodgett multilayers, 242
Aluminium alloys
Investigation of the anodic oxide layer on 1050 and 2024T3 aluminium alloys by electron microscopy and electrochemical impedance spectroscopy, 183
Aluminium oxide
Atomic layer deposition of ultrathin and conformal Al_2O_3 films on BN particles, 95
Aluminum
Microstructure of thermal hillocks on blanket Al thin films, 278
Amorphous films
Density and refractive index of TiO_2 films prepared by reactive evaporation, 218
Amorphous materials
Pyrazoline derivatives for blue color emitter in organic electroluminescent devices, 40
Anodic oxidation
Investigation of the anodic oxide layer on 1050 and 2024T3 aluminium alloys by electron microscopy and electrochemical impedance spectroscopy, 183
Anodizing
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303
Arachidic acid
The mechanical stability of Langmuir–Blodgett multilayers, 242
Arc evaporation
Influence of residual stresses on the mechanical properties of TiC_xN_{1-x} ($x = 0$, 0.15, 0.45) thin films deposited by arc evaporation, 167
Aromatic imides
Novel self-assembled films of zirconium phosphonate/1,4,5,8-naphthalenediimides, 109
Atomic force microscopy
Characterization of laterally structured Pb/Ge multilayers, 80
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303
Attenuation length
Growth mode of tin on a niobium substrate, 161
Auger
Growth mode of tin on a niobium substrate, 161

Boron nitride
Atomic layer deposition of ultrathin and conformal Al_2O_3 films on BN particles, 95

Cadmium oxide
High transmittance CdO thin films obtained by the sol-gel method, 105
Carbides
Texturing of polycrystalline SiC films on graphitic carbon in laminated composites grown by forced-flow chemical vapor infiltration, 114
Carbon monoxide
The aging effect on SnO_2–Au thin film sensors: electrical and structural characterization, 249
Catalytic reactions
Catalytic reactions over modified surfaces: a Monte Carlo study, 283
CeO_2
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211
Chalcogens
Optical properties of $CuAlX_2$ (X = Se, Te) thin films obtained by annealing of copper, aluminum and chalcogen layers sequentially deposited, 195
Chemical vapor deposition
Epitaxial growth of 3C-SiC on Si(001) using hexamethyldisilane and comparison with growth on Si(111), 53
Chemical vapor deposition (CVD)
Atomic layer deposition of ultrathin and conformal Al_2O_3 films on BN particles, 95
Chemical vapour deposition
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
Chemical vapour deposition (CVD)
PECVD of amorphous TiO_2 thin films: effect of growth temperature and plasma gas composition, 126
Coatings
Ultrathin Ta_2O_5 films produced by large-area pulsed laser deposition, 119
Mechanical properties and fracture toughness of multilayer hard coatings using nanoindentation, 178
Cobalt
Improved growth and perpendicular anisotropy in Pd–Co multilayers with intentionally alloyed layers, 225
Conductivity
Conducting potential range for poly(*o*-aminophenol), 28
Contact angle
Investigation of surface energy for organic light emitting polymers and indium tin oxide, 140
Corrosion
The effects of hydrogen on the breakdown of passive films formed on Type 304 stainless steel, 132
Corrosion
Effect of cracks in TiN anti-reflection coating layers on early via electromigration failure, 310
Creep deformation
Microstructure of thermal hillocks on blanket Al thin films, 278
Cu–In–Se thin films
Raman characterization of epitaxial Cu–In–Se thin films, 36

Deposition process
Mechanisms for reactive DC magnetron sputtering of elements with different atomic masses: large area coatings of Al oxide and W oxide, 86

PII: S0040-6090(00)01047-6

Ultrathin Ta_2O_5 films produced by large-area pulsed laser deposition, 119
Dielectric properties
Preparation and properties of multilayer $Pb(Zr,Ti)O_3/PbTiO_3$ thin films for pyroelectric application, 254
Diluted magnetic semiconductor
GaFeAs: a diluted magnetic semiconductor grown by molecular beam epitaxy, 272
Double-barrier junction
Light emission from the double-barrier $Al/Al_2O_3/Al/Al_2O_3/Au$ tunnel junction, 191

Elastic properties
Mechanical properties and fracture toughness of multilayer hard coatings using nanoindentation, 178
Electrical properties
Physical properties of vanadium pentoxide sol gel films, 259
Electrochemical impedance spectroscopy
Investigation of the anodic oxide layer on 1050 and 2024T3 aluminium alloys by electron microscopy and electrochemical impedance spectroscopy, 183
Electrochemistry
Conducting potential range for poly(*o*-aminophenol), 28
Electroluminescence
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
Exciplex emissions in bilayer and doped thin films containing a non-fluorescent gadolinium complex, 207
Electromigration
Effect of cracks in TiN anti-reflection coating layers on early via electromigration failure, 310
Electron microscopy
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47
Epitaxial growth of 3C-SiC on Si(001) using hexamethyldisilane and comparison with growth on Si(111), 53
Investigation of the anodic oxide layer on 1050 and 2024T3 aluminium alloys by electron microscopy and electrochemical impedance spectroscopy, 183
Improved growth and perpendicular anisotropy in Pd–Co multilayers with intentionally alloyed layers, 225
Emissive polymer
Investigation of surface energy for organic light emitting polymers and indium tin oxide, 140
Epitaxial
Raman characterization of epitaxial Cu–In–Se thin films, 36
Epitaxial growth
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47
Epitaxy
Epitaxial growth of 3C-SiC on Si(001) using hexamethyldisilane and comparison with growth on Si(111), 53
Exciplex
Exciplex emissions in bilayer and doped thin films containing a non-fluorescent gadolinium complex, 207

Ferroelectric thin film
Formation of hillocks in Pt/Ti electrodes and their effects on short phenomena of PZT films deposited by reactive sputtering, 264
Film defects
The mechanical stability of Langmuir–Blodgett multilayers, 242
Fluorescence
Investigation on monolayers and Langmuir–Blodgett films of atypical amphiphilic terbium complexes, 235
Focused ion beam
Microstructure of thermal hillocks on blanket Al thin films, 278
Fourier transform infrared spectroscopy (FTIR)
Atomic layer deposition of ultrathin and conformal Al_2O_3 films on BN particles, 95

GaFeAs
GaFeAs: a diluted magnetic semiconductor grown by molecular beam epitaxy, 272
Gallium nitride
An investigation into the early stages of oxide growth on gallium nitride, 153
Gas rarefaction
Mechanisms for reactive DC magnetron sputtering of elements with different atomic masses: large area coatings of Al oxide and W oxide, 86
Glow discharge
The crystal perfection improvement of $Y_1Ba_2Cu_3O_{7-x}$ thin films by afterglow plasma process, 231
Growth
Growth mode of tin on a niobium substrate, 161

Hafnium
Surface, structural and optical properties of sol-gel derived HfO_2 films, 61
Hardness
Influence of residual stresses on the mechanical properties of TiC_xN_{1-x} ($x = 0$, 0.15, 0.45) thin films deposited by arc evaporation, 167
Mechanical properties and fracture toughness of multilayer hard coatings using nanoindentation, 178
Heteroepitaxial
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211
Hillock
Formation of hillocks in Pt/Ti electrodes and their effects on short phenomena of PZT films deposited by reactive sputtering, 264
Hillock formation
Microstructure of thermal hillocks on blanket Al thin films, 278
Hydrogen
The effects of hydrogen on the breakdown of passive films formed on Type 304 stainless steel, 132
Hydrophilicity
Hydrophilicity of TiO_2 films prepared by liquid phase deposition, 148

InAs
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303
Indium tin oxide (ITO)
Investigation of surface energy for organic light emitting polymers and indium tin oxide, 140
Invar
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47

Langmuir–Blodgett films
The mechanical stability of Langmuir–Blodgett multilayers, 242
Langmuir–Blodgett films (LB films)
Investigation on monolayers and Langmuir–Blodgett films of atypical amphiphilic terbium complexes, 235
Laser ablation
Ultrathin Ta_2O_5 films produced by large-area pulsed laser deposition, 119

Light emission
Light emission from the double-barrier $Al/Al_2O_3/Al/Al_2O_3/Au$ tunnel junction, 191
Light-emitting diodes
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
Liquid phase deposition
Hydrophilicity of TiO_2 films prepared by liquid phase deposition, 148
Long-term stability
The aging effect on SnO_2–Au thin film sensors: electrical and structural characterization, 249
Luminescence
Pyrazoline derivatives for blue color emitter in organic electroluminescent devices, 40

Magnetic properties and measurements
Improved growth and perpendicular anisotropy in Pd–Co multilayers with intentionally alloyed layers, 225
Magnetron sputtering
Mechanisms for reactive DC magnetron sputtering of elements with different atomic masses: large area coatings of Al oxide and W oxide, 86
Mechanical properties
The mechanical stability of Langmuir–Blodgett multilayers, 242
Mercury
Interactions of thin oxide films with a low-pressure mercury discharge, 295
Metallization
Texture, twinning and secondary extinction of vacuum deposited silver thin films, 17
MgO
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47
Microstructure
Microstructure of thermal hillocks on blanket Al thin films, 278
Modified surfaces
Catalytic reactions over modified surfaces: a Monte Carlo study, 283
Molecular beam epitaxy
Molecular beam epitaxy of Ru_2Si_3 on silicon, 66
GaFeAs: a diluted magnetic semiconductor grown by molecular beam epitaxy, 272
Monolayers
Characterization of SnO_2 thin films grown from aqueous solutions, 1
Investigation on monolayers and Langmuir–Blodgett films of atypical amphiphilic terbium complexes, 235
Monte Carlo
Catalytic reactions over modified surfaces: a Monte Carlo study, 283
Multilayers
Mechanical properties and fracture toughness of multilayer hard coatings using nanoindentation, 178
Improved growth and perpendicular anisotropy in Pd–Co multilayers with intentionally alloyed layers, 225
Preparation and properties of multilayer $Pb(Zr,Ti)O_3/PbTiO_3$ thin films for pyroelectric application, 254

Nanostructures
Characterization of laterally structured Pb/Ge multilayers, 80
Naphthalenediimides
Novel self-assembled films of zirconium phosphonate/1,4,5,8-naphthalenediimides, 109
NRP
Light emission from the double-barrier $Al/Al_2O_3/Al/Al_2O_3/Au$ tunnel junction, 191

Optical properties
Surface, structural and optical properties of sol-gel derived HfO_2 films, 61
High transmittance CdO thin films obtained by the sol-gel method, 105
Optical properties of $CuAlX_2$ (X = Se, Te) thin films obtained by annealing of copper, aluminum and chalcogen layers sequentially deposited, 195
Physical properties of vanadium pentoxide sol gel films, 259
Organic electroluminescence device (OLED)
Pyrazoline derivatives for blue color emitter in organic electroluminescent devices, 40
Oxidation
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303
Oxides
Ultrathin Ta_2O_5 films produced by large-area pulsed laser deposition, 119
An investigation into the early stages of oxide growth on gallium nitride, 153
Interactions of thin oxide films with a low-pressure mercury discharge, 295
Oxynitride
An investigation into the early stages of oxide growth on gallium nitride, 153

Passive film
The effects of hydrogen on the breakdown of passive films formed on Type 304 stainless steel, 132
Permalloy
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47
Photoluminescence
Exciplex emissions in bilayer and doped thin films containing a non-fluorescent gadolinium complex, 207
Physical vapor deposition (PVD)
Asymmetrical strain distribution in sputtered TiN layers, 10
Plasma processing and deposition
PECVD of amorphous TiO_2 thin films: effect of growth temperature and plasma gas composition, 126
The crystal perfection improvement of $Y_1Ba_2Cu_3O_{7-x}$ thin films by afterglow plasma process, 231
Plasma sputtering
Initial growth structure of $Ni_{0.30}Fe_{0.70}$ films dc-biased plasma-sputter-deposited on MgO(001), MgO(110), MgO(111) and on MgO(001) covered with Fe or Permalloy, 47
PLD
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211
Poly(*p*-phenylene vinylene)
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
Polymers
Conducting potential range for poly(*o*-aminophenol), 28
Pt/Ti layer
Formation of hillocks in Pt/Ti electrodes and their effects on short phenomena of PZT films deposited by reactive sputtering, 264
Pulsed laser deposition (PLD)
Characterization of crystalline SiC films grown by pulsed laser deposition, 72

Pyrazoline derivatives
Pyrazoline derivatives for blue color emitter in organic electroluminescent devices, 40
Pyroelectricity
Preparation and properties of multilayer $Pb(Zr,Ti)O_3/PbTiO_3$ thin films for pyroelectric application, 254
PZT
Formation of hillocks in Pt/Ti electrodes and their effects on short phenomena of PZT films deposited by reactive sputtering, 264

Raman spectroscopy
Raman characterization of epitaxial Cu–In–Se thin films, 36
Rare earth complex
Exciplex emissions in bilayer and doped thin films containing a non-fluorescent gadolinium complex, 207
Reflection high-energy electron diffraction (RHEED)
Characterization of crystalline SiC films grown by pulsed laser deposition, 72
Reflection spectroscopy
Optical properties of $CuAlX_2$ (X = Se, Te) thin films obtained by annealing of copper, aluminum and chalcogen layers sequentially deposited, 195
Refractive index
Density and refractive index of TiO_2 films prepared by reactive evaporation, 218
Residual stress
Influence of residual stresses on the mechanical properties of TiC_xN_{1-x} ($x = 0$, 0.15, 0.45) thin films deposited by arc evaporation, 167
Resonant tunneling
Light emission from the double-barrier $Al/Al_2O_3/Al/Al_2O_3/Au$ tunnel junction, 191
Ruthenium
Molecular beam epitaxy of Ru_2Si_3 on silicon, 66
Rutherford back-scattering spectroscopy
Interactions of thin oxide films with a low-pressure mercury discharge, 295
Rutherford backscattering spectroscopy
Characterization of SnO_2 thin films grown from aqueous solutions, 1
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303

Semiconductors
Effect of cracks in TiN anti-reflection coating layers on early via electromigration failure, 310
Sensors
Preparation and properties of multilayer $Pb(Zr,Ti)O_3/PbTiO_3$ thin films for pyroelectric application, 254
Si
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211
SiC thin films
Characterization of crystalline SiC films grown by pulsed laser deposition, 72
Silicides
Molecular beam epitaxy of Ru_2Si_3 on silicon, 66
Silicon carbide
Epitaxial growth of 3C-SiC on Si(001) using hexamethyldisilane and comparison with growth on Si(111), 53
Silver
Texture, twinning and secondary extinction of vacuum deposited silver thin films, 17
Sol-gel
High transmittance CdO thin films obtained by the sol-gel method, 105
Physical properties of vanadium pentoxide sol gel films, 259
Sputtering
Asymmetrical strain distribution in sputtered TiN layers, 10
The crystal perfection improvement of $Y_1Ba_2Cu_3O_{7-x}$ thin films by afterglow plasma process, 231
Formation of hillocks in Pt/Ti electrodes and their effects on short phenomena of PZT films deposited by reactive sputtering, 264
Stability
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
Stainless steel
The effects of hydrogen on the breakdown of passive films formed on Type 304 stainless steel, 132
Stress
Asymmetrical strain distribution in sputtered TiN layers, 10
Stress relaxation
Microstructure of thermal hillocks on blanket Al thin films, 278
Structural properties
Texture, twinning and secondary extinction of vacuum deposited silver thin films, 17
Molecular beam epitaxy of Ru_2Si_3 on silicon, 66
Superconductivity
The crystal perfection improvement of $Y_1Ba_2Cu_3O_{7-x}$ thin films by afterglow plasma process, 231
Superlattices
Characterization of laterally structured Pb/Ge multilayers, 80
Surface and interface states
Surface, structural and optical properties of sol-gel derived HfO_2 films, 61
Surface energy
Investigation of surface energy for organic light emitting polymers and indium tin oxide, 140
Surface forces apparatus
The mechanical stability of Langmuir–Blodgett multilayers, 242
Surface structure
Texturing of polycrystalline SiC films on graphitic carbon in laminated composites grown by forced-flow chemical vapor infiltration, 114

Terbium complexes
Investigation on monolayers and Langmuir–Blodgett films of atypical amphiphilic terbium complexes, 235
Thin films
Growth mode of tin on a niobium substrate, 161
Influence of residual stresses on the mechanical properties of TiC_xN_{1-x} ($x = 0$, 0.15, 0.45) thin films deposited by arc evaporation, 167
The aging effect on SnO_2–Au thin film sensors: electrical and structural characterization, 249
Tin oxide
Characterization of SnO_2 thin films grown from aqueous solutions, 1
The use of tin oxide thin films as a transparent electrode in PPV based light-emitting diodes, 201
The aging effect on SnO_2–Au thin film sensors: electrical and structural characterization, 249
Titania
Density and refractive index of TiO_2 films prepared by reactive evaporation, 218
Titanium carbonitride
Influence of residual stresses on the mechanical properties of TiC_xN_{1-x} ($x = 0$, 0.15, 0.45) thin films deposited by arc evaporation, 167
Titanium nitride
Asymmetrical strain distribution in sputtered TiN layers, 10

PECVD of amorphous TiO_2 thin films: effect of growth temperature and plasma gas composition, 126
Titanium oxide
PECVD of amorphous TiO_2 thin films: effect of growth temperature and plasma gas composition, 126
Hydrophilicity of TiO_2 films prepared by liquid phase deposition, 148
Transmission electron microscopy
Characterization of SnO_2 thin films grown from aqueous solutions, 1
The formation of anodic oxides on InAs at high efficiency in sodium tungstate electrolyte, 303
Transmission electron microscopy (TEM)
Texturing of polycrystalline SiC films on graphitic carbon in laminated composites grown by forced-flow chemical vapor infiltration, 114
Tungsten
Effect of cracks in TiN anti-reflection coating layers on early via electromigration failure, 310
Tungsten oxide
Mechanisms for reactive DC magnetron sputtering of elements with different atomic masses: large area coatings of Al oxide and W oxide, 86

Ultra thin buffer
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211

Vanadium pentoxide films
Physical properties of vanadium pentoxide sol gel films, 259

X-Ray diffraction
Asymmetrical strain distribution in sputtered TiN layers, 10
Texture, twinning and secondary extinction of vacuum deposited silver thin films, 17
Surface, structural and optical properties of sol-gel derived HfO_2 films, 61
X-Ray photoelectron spectroscopy
Hydrophilicity of TiO_2 films prepared by liquid phase deposition, 148
X-Ray photoelectron spectroscopy (XPS)
An investigation into the early stages of oxide growth on gallium nitride, 153
Interactions of thin oxide films with a low-pressure mercury discharge, 295
X-Ray scattering
Characterization of laterally structured Pb/Ge multilayers, 80

YSZ
Heteroepitaxial growth of CeO_2 thin film on Si(001) with an ultra thin YSZ buffer layer, 211

Zirconium phosphonate
Novel self-assembled films of zirconium phosphonate/1,4,5,8-naphthalenediimides, 109
